lttr.io

Collect employee and customer feedback in minutes

Build your survey, share it with one link or QR code, and let people answer on their phones without signing in. Results are shown in aggregate, with small groups protected.

1
Create
Employee-satisfaction template or a blank survey; Turkish and English, plus German, Russian, Arabic if needed.

2
Share
One link and QR code for everyone. No account, name or email needed.

3
See results
Charts per question; CSV and JSON export.

What R1 includes

- Five question types: single choice, multiple choice, rating (NPS), Likert, free text
- Versioned publishing: a published survey never changes
- Multilingual surveys with right-to-left Arabic
- Mobile participation without sign-in; end time and closing
- Role-based team access: admin, editor, viewer
- Documented, versioned CSV/JSON export (ERP and business systems)

Privacy, without overselling

Participants are not asked to sign in or give a name or email; no time, IP, device or language is stored with a response. Results are shown only for questions at least 5 people answered; small groups are merged and free text is not shown on the results screen.

Planned (not available yet): AI-assisted interpretation and summaries · Recurring pulse surveys and automatic distribution · Live integration with HR and business systems

Try the live demo

Scan the QR code with your phone: answer the survey an employee sees, then look at the example results a manager sees. The demo contains synthetic data only.

Request a pilot: Leave your details in the form at lttr.io/en.

Sales and invoicing are handled by our partner ISIS Türkiye.
